*1 They let an eraser made of sand go and back on a tape. The number indicates "how many times" an eraser did this action until the scale will be unreadable.

*2 This is our own/original way of showing how rigid the tape is, not will be bent or warped.
The number indicates the force exactly the moment when tape snaps by being added force.

*3 It indicates the maximum strength of the nail by falling. It means, you drop Corve (tape stored inside) but still the nail will not be broken.
